Event Gallery — User Folder Report

Project: Event Gallery (User Frontend)
Repository: https://github.com/PrathmeshSose/Z_INTECH

1. Project Overview

The user/ folder is the guest-facing frontend of the Event Gallery platform. It allows event guests to enter an event code and view/download their event photos. It is a pure frontend built with HTML5, Bootstrap 5, Bootstrap Icons, and Vanilla JavaScript — no frameworks or backend required.

2. Folder Structure

```
user/
├── index.html          ← Home page (entry point)
├── css/
│   ├── index.css       ← Styles for home page
│   ├── access.css      ← Styles for access page
│   ├── gallery.css     ← Styles for gallery page
│   ├── view.css        ← Styles for photo view page
│   ├── about.css       ← Styles for about page
│   └── contact.css     ← Styles for contact page
└── pages/
    ├── access.html     ← Event code entry page
    ├── gallery.html    ← Photo grid page
    ├── view.html       ← Single photo view page
    ├── about.html      ← About page
    └── contact.html    ← Contact page
```

- Total HTML files: 6
- Total CSS files: 6
- One CSS file per HTML file (strict separation)
- index.html stays at root, all other pages inside pages/

3. Technology Stack

Technology	Version	Purpose
HTML5	—	Page structure

Technology	Version	Purpose
Bootstrap	5.3.3 (CDN)	Layout, components, responsiveness
Bootstrap Icons	1.11.3 (CDN)	All icons
Vanilla JavaScript	ES6	Interactivity, animations
CSS3	—	Custom styles, animations

4. Color Theme

Professional dark navy palette replacing Bootstrap default blue:

Variable	Hex Code	Used For
Dark Navy	#1a1a2e	Gradient start
Mid Navy	#16213e	Gradient middle
Primary Navy	#0f3460	Buttons, navbar, badges
Dark Footer	#212529	Footer background

5. Page-by-Page Details

index.html — Home Page

- Animated floating hero icon with dark navy gradient background
- 3 feature cards (Private Access, Beautiful Gallery, Easy Download) with scroll-reveal animation
- Animated counters section: 500+ Events, 50K+ Photos, 200+ Photographers, 30+ Countries
- Event type cards: Wedding, Birthday, Corporate, Graduation, Concert, & More
- Navbar shrinks/darkens on scroll
- Full footer with quick links and contact info

pages/access.html — Event Code Entry

- Centered card form on full dark navy gradient background
- Live input validation: green border if valid (≥4 chars), red border if too short
- Shake animation on invalid submit attempt
- Loading spinner on button when form submits
- Links back to ../index.html

pages/gallery.html — Photo Grid

- Responsive photo grid (2 cols mobile → 4 cols desktop)

- Search/filter bar — filters photos by title in real time
- Photo count badge updates dynamically as user searches
- Lightbox modal — click any photo to open full-screen preview
- Lightbox supports: prev/next buttons, keyboard arrow navigation, Escape to close, backdrop click to close
- Eye icon button on each card links to view.html

pages/view.html — Single Photo View

- Full-width photo frame with zoom toggle (click to zoom in/out)
- Download button (direct file download)
- Copy Link button with Bootstrap toast notification (bottom-right)
- Keyboard arrow navigation between photos (← →)
- Back to Gallery button

pages/about.html — About Page

- Dark navy hero section
- Mission statement with 4 stat cards (500+, 50K+, 200+, 30+)
- "How It Works" 3-step section (Upload → Code → View & Download)
- Team section with 4 member cards (circular photos, name, role)

pages/contact.html — Contact Page

- Dark navy hero section
- 3 info cards: Email, Phone, Address
- Contact form: First Name, Last Name, Email, Subject (dropdown), Message
- FAQ accordion with 4 questions (Bootstrap collapse)

6. CSS Architecture

Each page has its own dedicated CSS file. No shared stylesheet.

File	Key Styles
index.css	Hero gradient, float animation, scroll-reveal, navbar shrink, counter section
access.css	Full-page gradient body, shake animation, input-valid/invalid states
gallery.css	Photo card hover zoom, hidden transition, full lightbox styles
view.css	Photo frame, zoom cursor toggle, fixed toast container
about.css	Page hero gradient, stat-card hover, circular team image

File	Key Styles
contact.css	Page hero gradient, info-card hover

---

7. JavaScript Features Summary

Page	JS Features
index.html	Navbar shrink on scroll, scroll-reveal (IntersectionObserver), animated counters
access.html	Live input validation, shake on invalid submit, loading spinner
gallery.html	Lightbox open/close/prev/next, keyboard navigation, search/filter, photo count badge
view.html	Zoom toggle, keyboard navigation, copy link with clipboard API + toast

8. Responsive Design

- Mobile-first using Bootstrap 5 grid
- Navbar collapses to hamburger on mobile
- Photo grid: 2 columns on mobile, 3 on tablet, 4 on desktop
- All cards and forms are fully responsive
